Developing an Internet based Data Service at SSJDA in Japan

Presented at IASSIST 2010
in Cornell University, June 3rd

Keiichi SATO
University of Tokyo
Overview

- Social Science Japan Data Archive
  - Institutional framework
  - Some statistics
- Internet based Data Service
  - Web site renewal
  - SSJDA Direct
- Future issues
The Hub for Joint Usage and Research Center for Social Research and Data Archives authorized by Japanese Government (2010.4.-)

Center for Social Research and Data Archives, Institute of Social Science, University of Tokyo

Deposit Raw Data
Various research agencies and research groups
Approx. 100 institutions and groups

Fundamental Survey Research Group
Reserve, gather and make data public
SSJ Data Archive
Approx. 1300 data sets

Social Survey Research Group
Generate original primary data
Japanese Life Course Panel Survey (JLPS)
Japanese General Social Surveys (JGSS)

Cooperate with Surveyors in Japan
Osaka University of Commerce, JGSS Research Center

Development of empirical social research
Build a network of East Asia social surveys and data archives

Joint Research
Young Researcher Development
Researchers

Encourage secondary analysis
Secondary analysis workshops
Quantitative analysis seminars
Quontitative Social Research Group

Build international network
ICPSR, Japanese National Membership Association
Asian General Social Surveys
International Survey Research Group

Coordination with Data Archives Worldwide
IFDO, ICPSR
IASSIST, GESIS
SSJDA Activities

- gathering and storing social survey data
- preparing data sets for public use
- processing usage applications
- granting access to data
- maintaining and developing the online system.

Abstract

Survey Number | 0001
---|---
Survey Title | Survey on the Labor Market of New Graduates (of Lower Secondary Schools), 1953
Depositor | Institute of Social Science, University of Tokyo
Restriction of Use | Apply to SSJ Data Archive

Summary

How are lower secondary school graduates and the present and future of the Japanese industry related to each other? This research attempts to answer this question by analyzing "the amount of accumulated capital within the state" and "its direction", the relations between industries and school/skill training, the (social) strata-specific living standards and customs, especially in relation to the class-differentiation of peasantry; "the transformation of household labor into occupational labor"; and "the problems of unemployment among the pre-employed and low-wage industries" or "forms of existence of the reserve army." The research cross-classifies this particular labor market by industry, size, and region, and concludes: The labor market of the male graduates of lower secondary schools in Kanagawa Prefecture is structured into the following three strata and five regions: (1) "the top Stratum A of the Keihin Region labor market which covers the entire Prefecture"; (2) the second Stratum B which consists of "Yokosuka Region," "Chubu (Central) Region centering around Shonan cities," and "Seibu (West) Region" centering around Odawara City; and (3) the lowest Stratum C which represents an "agrarian region" encompassing Koza, Aiko, and Tsukui Counties. Inter-regional labor mobility takes two forms: a "direct form" in which labor moves from C to A; and a "chain form" in which labor moves from C to B and then to A. The "momentum of such labor mobility" is conditioned by disparities in working conditions which are manifested most intensively in wages, and the disparities are regional differences in the industrial structure and structural differences among companies of different sizes. The labor market of female counterparts differs from that of male graduates in that the former is characterized by a large extent of "regional blockade" as shown, for example, by their Keihin Region labor market which, unlike males, does not cover the entire prefecture. Also, regardless of region, female graduates' starting salaries are lower than males, and their regional disparities as well as dispersion are wider than those of male graduates.

Universe | All of the 1953 March graduates of the 188 public lower secondary schools (about 20,000 males and 19,000 females) in Kanagawa Prefecture.
Sample Size | See "Universe" above.
Time Period | July, 1953
Spatial Unit | Kanagawa Prefecture
Sampling Procedure |
**Spatial Unit** | Kanagawa Prefecture  
---|---  
**Sampling Procedure** |  
**Data Collection Method** | The researcher first distributed questionnaires (of the four, Ko, Otsu, Hie, and Tei types) to every school under the names of Kanagawa Prefecture and the School Board of Kanagawa Prefecture, requesting the teaching staff in charge of placement guidance to fill them out (on October 31, 1953), and then collected them on November 30 in the same year. In addition, interviewers were sent to some areas in which they visited students’ houses with “Individual Questionnaires” and filled them out as they interviewed.  
**Investigator** | The Society for the Research and Study of Labor Issues (Rodo mondai chosa kenkyu-kai) (with Kazuo Okochi, Masajiro Uijhara, Eiichi Eguchi, Koichi Sekiya, and Akira Takanashi)  
**Sponsors (Funds)** | The Ministry of Education (the Scientific Study Funds) and the Planning Office at the Kanagawa Prefectural Government (the Expert Committee Funds)  
**Major Survey Items** | Region of origin, family occupation, high school enrollment and employment, employer (industry, size, region, and working conditions), etc.  
**Data Status** | Registered on April 1, 1952.  
**Notes for User** | Computerized original questionnaires have been made public.  
Data Sets are written in Japanese.
Actual dissemination before

1. One needs to fill out an application form and mail it with a CD-ROM and self-addressed envelope with postage.
2. The form (paper) is forwarded to the PIs to obtain his/her permission for one year use by the applicant.
3. Data and metadata are burned on the CD and mailed back to the applicant.
4. After one year, s/he has to fill out an report form and submit it with publications (if available). Then, s/he either has to destroy the data files or apply for an extension.

Every step is conducted manually!!
SSJDA Direct

- Posting and CD-ROM
  - Number of data release and applications are increasing every year
  - Routine work becomes huge amount

Research Plan

(Description should be approximately 100-200 words in length.)

* For educational use, enter course name:
Pledge

1. I will use any raw data provided for educational purposes only. I will protect the secrecy of any individual data, and will not perform analysis that will allow identification of any individual respondent. The raw data obtained through this application will be used only by the applicant, and will not be given to any third party.

2. As a rule, all inquiries about surveys should be submitted through the SSJ Data Archive system, and not directly to the depositors of the surveys.

3. When reporting the results of my secondary analysis, I will append the credits noted in the Readme file that accompanied each data file, and clearly label the source of the raw data.

4. If there is any change in my user information, I will update that information registered with SSJDA Direct immediately.

5. I will inform SSJDA Direct when I present a paper, dissertation, thesis, etc. (1) At that time I will send two copies of such thesis, etc. to SSJ Data Archive by postal mail at the following address:
   SSJ Data Archive
   Center for Social Survey and Data Archive, Institute of Social Science,
   The University of Tokyo 7-3-1, Hongo, Bunkyo-ku, Tokyo, 113-0033, Japan

6. I will obey any other instructions from SSJ Data Archive

7. In the event that I incur any loss or damages as a result of using SSJDA Direct, I will hold neither SSJ Data Archive nor the depositor of the survey responsible in any way. I will strictly observe the conditions of this pledge.

(1) refers to printed matter including publications and papers, etc., reports from presentations at conferences, and reports from use in classroom experiments, class collaborative report, etc.

If the paper, etc. is a part of a larger publication, and it is difficult to submit the entire publication, submitting a copy of the relevant part of the publication is also acceptable. SSJ Data Archives forwards one copy of each paper, etc. that it receives to the depositors of that data which was used. In addition the title (and author name) of each paper, etc. will be listed on the JGSS Related Literature page of the JGSS website: http://www.jgss.daihoshodata.ac.jp.

- Purpose for Use: Research
- Data: 0600, Japanese General Social Surveys <JGSS-2006>

The dataset(s) are available for download starting on 20/May/2010. The last day data can be downloaded is 03/Jun/2010.

Please login to SSJDA Direct (https://ssjda.iss.u-tokyo.ac.jp/Direct/) to access the data.
System Overview
Pledge

1. I will use any raw data provided for educational purposes only. I will protect the secrecy of any individual data, and will not perform analysis that will allow identification of any individual respondent. The raw data obtained through this application will be used only by the applicant, and will not be given to any third party.

2. As a rule, all inquiries about surveys should be submitted through the SSJ Data Archive system, and not directly to the depositories of the surveys.

3. When reporting the results of my secondary analysis, I will append the credits noted in the Readme file that accompanied each data file, and clearly label the source of the raw data.

4. If there is any change in my user information, I will update that information registered with SSJDA Direct immediately.

5. I will inform SSJDA Direct when I present a paper, dissertation, thesis, etc. (1)
   At that time I will send two copies of such thesis, etc. to SSJ Data Archive by postal mail at the following address:
   SSJ Data Archive
   Center for Social Survey and Data Archive, Institute of Social Science,
   The University of Tokyo 7-3-1, Hongo, Bunkyo-ku, Tokyo, 113-0033, Japan

6. I will obey any other instructions from SSJ Data Archive

7. In the event that I incur any loss or damages as a result of using SSJDA Direct, I will hold neither SSJ Data Archive nor the depositor of the survey responsible in any way.
   I will strictly observe the conditions of this pledge.

(1) refers to printed matter including publications and papers, etc., reports from presentations at conferences, and reports from use in classroom experiments, class collaborative report, etc.
If the paper, etc. is a part of a larger publication, and it is difficult to submit the entire publication, submitting a copy of the relevant part of the publication is also acceptable.
SSJ Data Archive forwards one copy of each paper, etc. that it receives to the depositories of that data which was used.
In addition the title (and author name) of each paper, etc. will be listed on the JGSS Related Literature page of the JGSS website:
http://www.jgss.daishodai.ac.jp.

I Do Not Agree  I Agree
System Overview
* Select how you used the data from the following list:
  - No paper, etc. was ever presented.
  - The paper, etc. was presented, so a copy was sent to SSJDA.
    --> Please proceed with output registration.
  - There are plans to present the paper in the future. Copies will be sent to SSJDA immediately following the presentation.
    --> Please proceed with output registration.
