The Inter-American Development Bank Discussion Papers and Presentations are documents prepared by both Bank and non-Bank personnel as supporting materials for events and are often produced on an expedited publication schedule without formal editing or review. The information and opinions presented in these publications are entirely those of the author(s), and no endorsement by the Inter-American Development Bank, its Board of Executive Directors, or the countries they represent is expressed or implied.

This presentation may be freely reproduced.
Research & Data Tab

http://www.iadb.org
The IDB has more than 30 researchers producing working papers on economic and social topics. Many of these documents constitute background research for the IDB’s flagship publication “Development in the Americas” prepared by the Research Department. In addition, the IDB also finances and mentors studies conducted by other institutions in order to build knowledge and research capacity. The Bank supports two organizations: the Institute for the Integration of Latin America and the Caribbean, also known as INTEGRAL; and the Inter-American Institute for Economic and Social Development, or INDES.
Macroeconomics & Finance: MicroData

- **Bank Ownership and performance** *(2004)*
