About This Guide

Important information researchers should read before downloading any data files.

The Latin American Public Opinion Project, hosted at Vanderbilt University, has been operating since the 1980s. Surveys are available for various countries for different years and may or may not have English translations.

These data are licensed for educational use by UNC affiliates only and may not be shared with others or used for commercial purposes.

Download Instructions

You MUST Complete an IRB Application!

UNC-Chapel Hill researchers using these data must have fulfilled all IRB requirements. Researchers may start their IRB applications with the Office of Human Research Ethics (see link below).

Licensed Data

These data are licensed by the UNC library from Vanderbilt University's LAPOP office, which license imposes these restrictions:

- They may only be used for educational purposes; no commercial use is allowed.
- They may NOT be deposited to a journal. Consequently, articles based on these data may only be published with journals that do not require data deposit.
- They may not be shared with anyone not affiliated with UNC. Other universities also serve as repositories for LAPOP data, however, so non-UNC researchers should check with LAPOP to see if their institution is a repository (see link below).

You MUST Complete an IRB Application!

UNC-Chapel Hill researchers using these data must have fulfilled all IRB requirements. Researchers may start their IRB applications with the Office of Human Research Ethics (see link on the Requirements tab).

File Arrangement

The download directory presents sub-directories for each country by single year of survey (e.g., "1983 Costa Rica," "1985 Costa Rica," etc.). Within a given sub-directory, compressed files are available to download in .rar* or .zip format for the convenience of downloading the questionnaire and data file together. The files are also provided individually should a user want to examine one file without the others. You do not need to download both the compressed and uncompressed files. Note, however, that the survey documentation is not included in the compressed files; these are usually .pdf files.

*.rar files may be decompressed with programs like:
- 7-zip or
- WinRAR

Go to Data Download Site

Access the download site to see the years available for each country. You will need to log in with your Onyen.

Why is this necessary?

All content that requires authentication via the proxy server is licensed to the University by commercial vendors who require that we limit access to current students, faculty, and staff of the University.

An industry has sprung up around the world of large-scale piracy of this vendor content via University connections. Pirates obtain authentication credentials—like PIDs—share them on websites, and download entire runs of journal articles with the stolen credentials. When the vendors detect this piracy, they completely shut off access to their resources to all users from the compromised University.

PIDs are considered public information. So we must use secure authentication methods with a password that is known only to the rightful user.
Latin American Public Opinion Project (LAPOP)

By using these data sets you agree that you are currently affiliated with the University of North Carolina at Chapel Hill and have fulfilled all IRB requirements. The data may not be disseminated to third parties.

Have made records for Esri *Data & Maps* and other GIS data, too
Geospatial data often come in sets or compilations

Esri Data & Maps

- Large collection of individual data sets
- Accompany semi-annual release of Esri software
- Several CD-ROMs or DVD-ROMs
- High-quality base data sets, including comprehensive metadata
- Available to all Universities with an Esri site license
- Most libraries catalog at this level

A. Henley, LAUNC-CH presentation, 3/11/2014
Larger OPAC Tweaks

- Formats added for Geospatial Data and Statistical Datasets and assigned to existing records
- Location codes added for downloadable data sets

A. Henley, LAUNC-CH presentation, 3/11/2014, with edits

Description
Language: English
Access: Access granted to Licensee only.
Restrictions:
Esri supplied records for data layers in FGDC (CSDGM) but UNC still needed:

• Permission from Esri to upload to WorldCat:
  o Legal permission to create records for the UNC catalog
  o Legal permission to upload same into WorldCat for other licensed Esri libraries
  o For each record we added a 588 field: “Descriptive metadata copyrighted by Esri and used by permission.”
• To persuade WorldCat we had Esri’s permission
• UNC Licensing team sign-off

A. Henley, LAUNC-CH presentation, 3/11/2014
For Future: More Tweaking

- Notes about data deposit (not)

- Wording that need not change
  - “(ask at ref desk)”

- Pushing vendors
  - Technical setup
  - Text mining rights
