About the Archive

The Shelley-Godwin Archive will provide the digitized manuscripts of Percy Bysshe Shelley, Mary Wollstonecraft Shelley, William Godwin, and Mary Wollstonecraft, bringing together online for the first time ever the widely dispersed handwritten legacy of this uniquely gifted family of writers. The result of a partnership between the New York Public Library and the Maryland Institute for Technology in the Humanities, in cooperation with Oxford's Bodleian Library, the S-GA also includes key contributions from the

Want to get the most out of HathiTrust?
Log in with your partner institution account to access the largest number of volumes and features.
Not with a partner institution?
Welcome to the HathiTrust Research Center!

The HathiTrust Research Center (HTRC) provides research access to the public domain corpus of the HathiTrust Digital Library. The HTRC is a collaborative research center launched jointly by Indiana University and the University of Illinois, along with the HathiTrust Digital Library, to help meet the technical challenges of dealing with massive amounts of digital text that researchers face by developing cutting-edge software tools and cyber-infrastructure to enable advanced computational access to the growing digital record of human knowledge. The HTRC provides an infrastructure to search, collect, analyze, and visualize the full text of nearly 3 million public domain works and is intended for nonprofit and educational researchers.

What would you like to do today?

- Create Workset
  - Create workset using our workset builder.

- Upload Workset
  - Upload a workset by specifying the necessary data about its volumes through a text file.

- Browse Workset
  - Browse through already created worksets.

- Execute Algorithms
  - Select and execute text analysis algorithms for word count to more sophisticated approaches.
