Data User Services
NADAC provides the following services to assist data users:
• Identification of arts and culture data on specific topics
• Online analysis and customized subsetting of selected datasets using the Survey Documentation and Analysis (SDA) statistical software written by staff at the University of California-Berkeley.
• Assistance with retrieval and use of data files from NADAC
• Bibliographic citations to publications based on research data in NADAC
• Information in understanding and using research data

Data Depositor Services
NADAC provides the following services to assist data depositors:
• Technical assistance with data preparation
• Consultation on data collection to enhance the quality of the data for analysis
• Confidentiality reviews of data

Featured Data
• 35478: General Social Survey, 2012 Merged Data, Including a Cultural Module [United States]
• 35168: Survey of Public Participation in the Arts (SPPA), 2012 [United States]

Affiliations
NADAC is one of several topical archives hosted by the Inter-university Consortium for Political and Social Research (ICPSR), the largest social science data archive in the world and part of the University of Michigan’s Institute for Social Research. NADAC is funded by the National Endowment for the Arts (NEA). Because of NEA’s support, users obtain data from NADAC at no charge.

NADAC Data Exploration Tools for the Public
The NADAC website provides free and useful tools that enable data users to quickly and effectively explore arts and culture data. NADAC Data Exploration Tools include the following:

Quick Facts is a valuable tool that provide infographics and statistics on topics including artists and performers, funding issues, public attitudes, arts education, and arts organizations.

Quick Tables allows NADAC users to generate custom crosstabulations from a pre-selected subset of the variables in the study.

Simple Crosstab Builder is a tool that presents a streamlined interface for generating frequencies for one variable or for building a table of two variables.

Publication Search helps NADAC users find articles or reports related to the dataset they are interested. NADAC users can refine their search using filters for type of publications, journals, and authors.
